

Port Access Charge (PAC)

Valid from 01.01.2025

Application

The port access charge (PAC) is a surcharge pursuant to clause 10 of the Service catalogue of DB Cargo AG and is raised in the ports listed via a code number in addition to the freight rate.

It applies per loaded wagon, not to empty wagons (exception: Port of Duisburg WRS). For the Port of Hamburg and Port of Regensburg Rola, the charge applies in single wagonload traffic (individual wagons or wagon groups) per loaded wagon, in trainload traffic per loaded trainload.

For container traffic, a price per loading unit applies on principle. This applies to both loaded and empty containers.

The inclusion of the surcharge in the freight rate is not permitted.

As code numbers, please use nos. 272 (Consignment) und 273 (Reception).

For consignments between two freight traffic locations within a port, the PAC will be raised twice.

Ports in alphabetical order

| Port | Freight traffic location nr. | Name of freight traffic location | PAC - per loaded wagon in € - | PAC - per loaded unit (LU) in € - |
