

Cargo

Regional Sales at DB Cargo

Your experts and trusted regional partners for the best environmentally friendly logistics solution

Are you increasingly facing logistical challenges or would you like to significantly reduce your CO₂ footprint?

Challenge accepted! We offer you and your company a smooth process, dealing with bottlenecks in supply and volatile transport capacities as well as the best environmentally friendly logistics solution for the delivery of your goods!

DB Cargo is your **strong partner** for implementing your logistic requirements. We provide you with comprehensive advice so that you can get your goods to their destination quickly and, above all, safely.

The advantages of rail include:

- Our Regional Sales at DB Cargo is your single point of contact for the **entire logistics process**
- From **consulting** to the implementation of your **individual logistics concept**, we offer you a one-stop solution
- **Fast and efficient transport** regardless of traffic conditions
- Eco friendly freight service possible. From as little as **one wagon or container** - even without your own railway siding
- **Lorry & rail** can be easily combined

We get your goods to their destination smoothly and on time.

We make logistics easier for you. Our network connects customers **across Europe and across industries**. Our mission is to get your goods to their destination fast, safely and environmentally friendly.

Your expert contact. In your area and directly on site.

We are at your service in approx. 20 countries. Individual support is provided locally in your national language. We use our **long-term and extensive knowledge** of the regions and logistics sites to suit you.

International Sales

Our logistics for everyone. No limits.

We offer **innovative logistics solutions** for every demand. Thereby we operate across all industries and products. For the transport of smaller quantities, we provide individual wagons or containers - **even without a private siding**. If you do not yet have a direct connection to the rail network, we are able to support you and provide you with all you need.

If you would like to connect your company to the rail network, we will work out the best solution together with you. We also transport your goods from **door-to-door** by developing individual logistics solutions **combining road and rail**. This gives you the greatest flexibility for your transport project and optimizes your carbon footprint by using rail.

A strong network. Across Europe.

We advise and support you across national borders. Our network is broadly based, even beyond the borders of Deutsche Bahn. That's why we can offer you **Europe's largest logistic network** with valuable partners.

We advise you holistically on your entire logistics process.

Benefit from:

- Access to the rail network
- Door-to-door transport with the main run on rail plus pre-and on-carriage on the road
- Creation of the ideal transport concept
- Implementation under the aspect of sustainability

Your access to rail. Fast and simple.

We believe that rail logistics are easy. That is why we combine **sustainability** with **fast and individual solutions**. In doing so, we advise and accompany you from the very beginning and support you along the entire logistics process.

Your advantage: Green logistics for more sustainability

The future of logistics is "green". To protect the environment and to achieve **climate targets**, it is necessary to shift traffic from road to climate-friendly rail. After all, every ton transported by rail **saves 80% of CO₂** compared to lorries.
