

# Cargo

# Non-stop from Passau to the North Sea – for single wagonloads too

DB Cargo and TFG Transfracht offer eco-friendly transport to and from Passau for single freight wagons and containers.

TFG Transfracht's AlbatrosExpress has daily services from Passau to the ports on the North Sea. The transshipment point is the terminal at bayernhafen Passau, which is now open not just for combined transport but for single wagonload traffic too. The terminal can link up single wagonloads for transport by rail. Besides this, DB Cargo also offers many other connections for single wagonload and combined transport in its Europe-wide network.

## The benefits for you:

**Connection to German and international single wagonload transport:** no need for your own siding

Rail transport available **starting at a single wagon** – with over 300 different wagon types, we can load almost anything

**Faster and more efficient than lorries:** particularly over long distances, rail beats road

**Environmentally sustainable transport:** 80% fewer CO2 emissions than lorries produce

We look forward to hearing from you and are always happy to help.
